PROFESSIONAL SUMMARY

Android developer with 4+ years shipping production mobile apps. Built 10+ applications: 1 production launch (Maktabati), a cross-platform messaging app (Chirp), and 8+ personal and course projects. About a year hands-on with KMP/CMP and lightweight Ktor backends, including shipping to Desktop and iOS. Recently working with **Spring Boot** and PostgreSQL through coursework and side projects. Completed 8+ advanced tracks, including the Udacity Android Kotlin Nanodegree and JetBrains-collaborated courses on PL-Coding.

SKILLS

Mobile & Desktop: Android SDK, Jetpack Compose, KMP/CMP, Offline-First

Backend: Spring Boot (Kotlin), Ktor, PostgreSQL, Redis

Architecture: Clean Architecture, Multi-Module, MVVM, MVI

Languages: Kotlin (Expert), Java (Legacy)

Tools & DevOps: Git, Bitrise CI/CD, Postman, Gradle

Libraries: Koin, Hilt, Room, Retrofit, Coil, Coroutines & Flow

WORK EXPERIENCE

Android Developer — Kay Technology

Mar 2022 – Present | Riyadh, Saudi Arabia

- Took **full technical ownership** of the Android product. Migrated legacy Java/XML to Kotlin + Jetpack Compose, cutting crash rates by **40%**.
- Built reusable internal SDKs (auth, search, downloads), speeding up team delivery by **25%**.
- Designed Material 3 Compose UIs with Coil and Lottie, increasing session duration by **15%**.
- Set Clean Architecture/MVI standards plus a Bitrise CI/CD pipeline, cutting onboarding time by **50%**.
- Built lightweight Ktor micro-services for auth and content, improving API response times by **30%**.

Researcher — Kay Technology

Sep 2017 – Mar 2022 | Riyadh, Saudi Arabia

- Co-built **Kay Scanner**, a device that scans physical books without manual page-flipping. Hardware control, image capture, and scan-pipeline automation.
- Helped deliver **Kay Labs**, a 3D-printing lab with Imam Muhammad bin Saud University (CCIS), equipped with Ultimaker hardware for student prototyping.
- Hands-on with Fusion 360, Ultimaker hardware, and Cura. Led into mobile engineering at Kay Tech in 2022.

EDUCATION

Bachelor (Honors) of Electrical Engineering — Academy of Engineering Sciences

2011 – 2016

FEATURED PROJECTS

Maktabati | Kay Technology | Mar 2022 – Present

[View →](#)

Rebuild of the company's PDF viewer into a research library. Browsing, 1000+ page PDF reading, search, offline caching, sign-in, and resumable downloads. *Tech: Kotlin, Compose, Room, Ktor*

Chirp | PL-Coding | Nov – Dec 2025

[View →](#)

Cross-platform messenger (Android, iOS, Desktop) with 100% shared code, offline-first WebSocket sync. *Tech: KMP, CMP, Koin, Spring Boot, Room, FCM*

Runique | PL-Coding | Apr – Nov 2024

[View →](#)

Multi-module running tracker with Wear OS sync, real-time GPS, and OAuth. *Tech: Kotlin, Compose, Koin, Room, Ktor, Maps SDK, Wear OS*

EchoJournal | PL Campus | Jan – Feb 2025

[View →](#)

Audio journaling app with mood/topic tagging, search, and filtering. *Tech: Kotlin, Compose, MVI, Room, MediaRecorder*

ScribbleDash | PL Campus | Apr 2025

[View →](#)

Drawing app with 1:1 canvas, undo/redo, Clean Architecture/MVI. *Tech: Kotlin, Compose, MVI, Koin, Material 3*

Translator KMM | PL-Coding | Feb – Apr 2023

[View →](#)

Translation app for 28 languages on Android and iOS with shared KMM logic. *Tech: KMM, CMP, Ktor, SQLDelight*

CERTIFICATIONS

2025: Building Industry-Level CMP Desktop Apps · Building Industry-Level CMP Android & iOS · Kotlin Backends With Spring Boot — all *PL-Coding* × *JetBrains*

2024: Essentials of Industry-Level Android Dev · Building Industry-Level Wear OS Apps · Testing Large-Scale Multi-Module Apps — all *PL-Coding*

2022: Professional App Development with CI/CD (*PL-Coding*) · Android Kotlin Developer Nanodegree (*Udacity*)
